In thie report will be found the statietical information concerning the Bureau of Mental Health for the fiecal year ending May 31, 1946. The data presented in thie bulletin will give an analytical picture of the problems faced by the mental inetitutione in the Commonwealth during thie period.

In the war years,mental inetitutions were seriouely handicapped through their inability to secure personnel and neceesary materiale needed for maintenance and proper operation. During the past few months conditione have improved. Superintendente report that they are gradually employing additional personnel and in many hospitals the proffeesional service has been etrengthened. Every effort ie being put forth to improve the care of patiente, and one of the moet important factore is the type and number of employeee.

Nine of the twenty-two hospitale eupervised by the Bureau of Mental Health and operated by the Commonwealth were previously under the supervision of individual countiee, or citiee, or private corporations. The laet of theee hospitals was taken over by the State in 1945. Many of theee institutions were in need of major repaire, and thie wae imposeible because of the restriction during the war period. However, eome progress is evident in these institutions.

The prospecte for the future are brighter and many plane are underway to continue the improvement.

Department of Welfare
Charlie R. Barber
Secretary

The statistical tabulatione appearing in thie Twelfth Annual Report, Section A, follows the eame pattern as that which has been used for a number of years. Many authorities in the field of Mental Health have voiced dieeatiefaction with the echedulee used in collecting data. They, however, agree that no change ehould be made by a State until the National pattern ie revieed.

In addition to the tables appearing in thie bulletin, numerous epecial studies concerning all phases of administration of Mental Hoepitale and care of patients have been made by the Divieion of Reeearch and Statietics.

General conditione of the country influencee all types of eervices. When reviewing the tabulations contained in thie bulletin, it muet be remembered that thie period represents the closing months of World War II and the nine monthe immediately following the end of the war.

All annual reporte and special studiee are compiled by the Division of Research and Statistics, under the supervision of Mre. Gertrude H. Thompson.

The annual statistical bulletine ieeued by the Department of Welfare are three in number: Section A, Mental Health; Section B, Penal Institutione; and Section C, Fiecal Tabulations, Institutional Management, Children's Institutions and Agencies and other community problems.

* No capacity figures are given for Western State Psychiatric Institute and Clinic and Ransom Mental Hospital because of the type and nature of these institutions.

BUREAU OF MENTAL HEALTH

This Annual Report is the twelfth of a consecutive series on statistice selected from various data submitted to us by State-owned and State-aided mental inetitutions of the Commonwealth. The present issue covers the fiscal year ending May 31, 1946.

The State institutions of the Commonwealth comprise eeventeen for the mentally ill, one institute for research and training, and four for the mentally defective and epileptic - 22 in all. Ransom Mental Hoepital which servee certain poor dietricts in Lackawanna and Luzerne Counties is the only remaining institution belonging to a political sub-division which has not yet been disposed of by the Commonwealth under Act 21, of 1938,as amended, eetablishing the principle of complete State care of indigent mental patiente in institutions.

A complete comparieon of these statistics with those of other years ie etill of little value as they are influenced by the inability of the inetitutions to give full eervice to the public under wartime conditione. Voluntary commitments, mild senile psychoeee, chronic cuetodial casee, and habit act patiente are under eevere restrictione in favor of admiesions of the emergency and acutely dieturbed mental patients. Many peychotic veterans are now appearing who in civilian life may not have been mental casualtiee at this time. The State mental institutions are still on a relative quota basie in accordance with the Departmental's ruling of December 1943. Perhaps these various preesuree for a more rapid turnover are in part reeponsible for the marked increase on parole rate during the last couple years notwithetanding limited therapeutic facilities. In relation to the total census at the end of each fiecal year we have the percentages of paroles as follows:

1942 - 12.4%; 1943 - 12.3%; 1944 - 12.5%; 1945 - 13.2%; 1946 - 13.5%

The statietics on mental health listed in thie bulletin are patterned after the standards set up by the American Peychiatric Association. The indivi-

dual record cards for all types of commitments follow the forms recommended by this committee.

Question has been raised as to the need for revising the statistical information in this field. For example; the use of alcohol in relation to mental illness of various types may no longer be important. In the first place such information is so relative and highly a matter of opinion that we seriously doubt the acquisition of this fact in any patient's history is interpreted uniformly. Secondly, alcoholism itself is generally regarded as a sympton even per se so its consideration in any mental illness may be incidental and more of a social than a scientific medical import. Finally, this particular tabulation has been given regularly over a period of essentially the same social customs so that its purpose could well have been served by now.

The tabulation of a patient's condition on discharge is inadequately defined. Medical and lay opinion view results by different standards. As pointed out by Dr. George H. Preston, Commissioner of Mental Hygiene for the State of Maryland, such statistics would have more significance and could be much better evaluated if the condition of the paroled patient were identified with the degree of his adjustment. (MODERN HOSPITAL, Vol. 66, No. 3, p. 67, March 1946). The term "improved" has too many connotations and might cover situations of useful employment with various degrees of proficiency, of activity not gainful, or of mere cooperation with home supervision.

It is important, however, that uniform statistics be followed throughout the United States so that national figures may be available on this subject. Consequently, no change will be made on the tabulations for Pennsylvania, until the national pattern has been revised. This fiscal year saw the successful conclusion of World War II followed by a period of readjustment not yet completed. Rapid demobilization and a tremendous demand for public services of every type has created a continued challenge to all kinds of institutions. In the mental

field we are still under war-time pressure. Some encouragement ie at hand in that ws ars now on ths upward trsnd and can see a futurs ahsad. But ths back-log and lag is so great that qualitatively the eituation ie unchanged. A mounting public criticism of Stats Mental Institutions is now being faced as national unrsst focuess attention upon domsetic problems. Ws are, howevsr, fortunate in sharing the public'e interest for we need public understanding and support of an aggreseive Mental Health program. Thie is our opportunity to take the public into our confidence and, by a frank etraightforward sxposition of facts long familiar to ue, secure ths common objective of mssting all ths msntal health neede of our citizens. And these neede will surely be met ae ths services of prsvsntion and trsatmsnt of mental illnses gradually msrge in concept with the provisions for handling msdical and surgical diseasee.

WESTERN STATE PSYCHIATRIC INSTITUTE AND CLINIC
Year Ended May 31, 1946

The Western State Psychiatric Hospital was opened in 1942. It is located at Pittsburgh. By an Act of the General Assembly of 1945, the name was changed to Western State Psychiatric Institute and Clinic.

The Institute has a unique function in the program of Mental Health in the Commonwealth of Pennsylvania. Its emphasis is on discovering better methods of treating persons who are mentally ill. In addition, research and study are directed toward the prevention of mental illness. The program of this Institute is planned in cooperation with related institutions and professional groups.

Since this is the only State-Owned Institute for research and training in the field of mental health, its functions are different from those of other mental institutions. Therefore, no comparisons can be made such as population, percentage of occupancy, patient ratio or per per capita costs.

The objectives of the Institute are:
(1) Research - the vigorous and intensive study of methods or treatment using selected cases drawn from the whole Commonwealth.

(2) Education - the training of medical students, post graduates, physicians on the staffs of the State Institutions and other personnel such as nurses and social workers.

(3) Observation - an examination of selected cases, offering difficult and unusual problems which may have educational value and require extensive research.

(4) An extensive Out-Patient Department through which a considerable amount of local institutionalization may be avoided. This Clinic also acts as a model and is used for the purpose of improving out-patient clinics in other parts of the State.

COMMONWEALTH OF PENNSYLVANIA

TWELFTH ANNUAL STATISTICAL REPORT

of the

Department of Welfare

S. M. R. O'HARA
Secretary

1946

Bulletin No. 90 Penal Section B

-10

This Section of the Annual Statistical Report presents facts and tables concerning the individuals who are confined in the State and County Penal and Correctional Institutions of the Commonwealth of Pennsylvania.

These figures represent the period from June 1, 1945 to May 31, 1946, which was the terminal period of World War II. And it is noted with a degree of satisfaction that the male population of the County Prisons and State Penitentiaries was below average.

During this period competent personnel was difficult to secure, and supplies and construction materials were scarce and in many instances unobtainable. It is encouraging to note both these conditions are improving and in many of our institutions the majority of the vacancies have been filled.

Each Penal Institution has two responsibilities. First, that of protecting society by holding the offenders securely; and second, to present methods and programs by which the inmates may equip themselves to become trustworthy citizens when they are released to society. A thorough study is being made by the Department of Welfare so that good custody can be maintained without extravagance and also that a maximum amount of rehabilitation opportunities are a part of each institution's program.

The interest and support of the citizens in each community are a vital part of any penal program. Eventually all individuals sent to Penal Institutions must return to community life.

Department of Welfare

Charlie R. Barber

Secretary

This represents the second Section of the Twelfth Annual Statistical Report. Populations and commitments to County and State Penal Institutions are recorded and analyzed in table form. The first Section of this series is Section A, which deals with the problems of Mental Health. Section C, presents facts concerning Child Care, Care of the Aged, and other activities supervised by the Bureau of Community Work.

In order to improve the statistics concerning County Prisons, a new table analyzing commitments has been added to this bulletin. This table gives the method by which the different individuals were received in the County Prison, and also, the method by which they were released or transferred from the institution.

The County Prisons during the war period contributed a real service to the military forces in providing temporary custody for military persons.

Statistics concerning the Criminal Courts and also a report of the activities of the Division of Prison Industries appear in this Section. The Division of Research and Statistics under the supervision of Mrs. Gertrude H. Thompson, compiled and edited this bulletin.

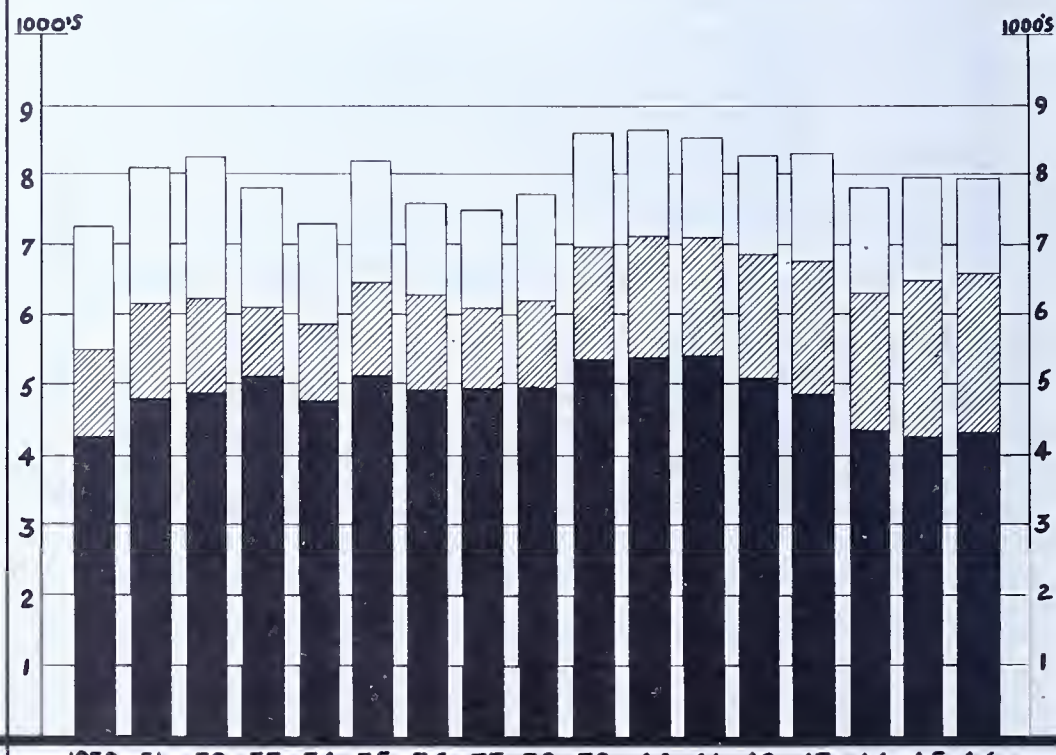
STATE INSTITUTIONS
PENAL
AND
CORRECTIONAL
POPULATION MAY 31
1930——1946



BUREAU OF CORRECTIONS

This Bureau within the Departmsnt of Welfare is responsible for the supervision, inspection and rsgulation of all penal and correctional institutions throughout the Commonwealth of Pennsylvania.

The Bureau is governed by Laws and Acts of General Assembly, the Administrative Code and standards prescribed by the Secretary of Welfare and the Welfare Commission, covsring ths physical, maintenance and administrative policies in the institutions. The primary duty of the Bureau is to visit and inspect, at least once each year, all State-owned and State supervised psnal and correctional institutions; supervising and regulating, and investigation of all unusual occurrences to insurs just and humane care and treatment of all persons confined thersin; also, it is the Bureau's duty to supervise the transfer of inmates from one State penal and correctional institution to any other State penal or correctional institution; to formulate and put into operation plans for the classification of institutions, and to formulats and put into operation a program for the classification of inmates so that the inmates may be grouped in those institutions which have the proper facilities.

Each institution has a classification board and it determines the type of confinement best suited to the individual. Careful study is made as to the training for which he is adapted,

the educational and vocational training necessary to equip him for the future; the medical and surgical services he may require; and the psychological and psychiatric treatment necessary. The spiritual need of those incarcerated is administered by the Chaplains in a well organized program. Balanced diets, proper housing, exercise, hobbies, libraries, recreation and entertainment is afforded the inmates; also, an effort is made to afford suitable work through employment in prison shops and farms. All these efforts toward individualization are employed to assist the offender in rehabilitating himself so that when he returns to society he is fortified from further criminal tendency.

The institutions inspected and supervised by the Bureau of Corrections are as follows: Eastern State Penitentiary, Philadelphia; New Eastern State Penitentiary, Graterford; Western State Penitentiary, Pittsburgh; New Western State Penitentiary, Bellefonte; State Industrial Home for Women, Muncy; Pennsylvania Industrial School, Camp Hill; Pennsylvania Institution for Defective Delinquents, Huntingdon; Pennsylvania Training School, Morganza; Allegheny County Workhouse, Blawnox; House of Correction, Philadelphia; 68 county prisons and 500 city, borough and township lockups.

An increase in crime and delinquency is anticipated for the next few years, and it will be necessary for the Commonwealth to erect new institutions and to provide additional facilities to

adequately segregate offenders according to age, criminal records and nature of crime so that the classification plans for institutions and inmates can be properly carried out. This will give the offender a maximum opportunity to rehabilitate himself and not be associated with the hardened criminals.

To combat the increase of crime I suggest the following program: (1) a rebirth of the American home with its high moral standards; (2) education of the parents in their parental responsibilities; (3) strict censorship of moving pictures portraying sex, crime and murder as depicted on the screen today; (4) strict censorship of literature dealing with sex and crime which is flooding the markets of our country; (5) strict censorship of radio programs dealing with crime in its worst aspect, - programs which hide behind the phrase "CRIME DOESN'T PAY", nevertheless, the plot of crime is definitely portrayed and is quickly absorbed by the juvenile and adult listener; (6) Federal, State and County authorities should always be alert and ready to expose any activity which leads to the lowering of our moral standards.

The above program can be put into effect if cooperation and action can be secured from the press, churches, schools, civic organizations, women's clubs, fraternal organizations, law enforcing agencies and all the sincere God-loving American citizens.

The tables and graphs appearing in this report present much information dealing with the crime, offender, the institution

and criminal justice program. The main object of this report is to impress upon the reader that every effort toward individualized treatment of the inmate is in its productive stage, and that the results have proven the worth of advanced penological views in the care, treatment and custody of the persons confined in all of Pennsylvania's penal and correctional institutions.

COMMONWEALTH OF PENNSYLVANIA

TWELFTH ANNUAL STATISTICAL REPORT

of the

Department of Welfare

S. M. R. O'HARA
Secretary

1946

Bulletin No. 90 **General** **Section C**

-10

This is the third Section of the Twelfth Annual Statistical Report. Section A, deals with Mental Institutions and Section B, presents facts concerning Penal Institutions.

In both the Penal and Mental field the responsibility of the Department of Welfare is in the construction, maintenance and operation of institutions. In order to prevent wasteful over-lapping, the Bureau of Institutional Management supervises the maintenance and construction activities in both types of institutions. On the staff of this Bureau are engineers, a consultant on nursing service, a dietician, and agricultural specialists.

The period which this report covers represents the closing of World War II. Many varied problems of maintenance and operation occurred during this period. Substitutions and temporary arrangements had to be made in order to guarantee continued operation of the mechanical equipment in many institutions. Because of the shortage of food, farm programs had to be accelerated.

Out of this experience new ways of solving difficult problems were developed which will insure more efficient service when personnel and materials return to normal supply. Recent reports indicate a definite upward trend in these two necessary items, and many postponed projects are or will soon be underway. In addition to the direct service with the State-owned, Mental, Penal, and Medical and Surgical Institutions, the Bureau of Institutional Management also gives consultative service to State-aided and public institutions supervised by the Department of Welfare.

The Bureau of Community Work performs the activities which the

title indicates. It is responsible for supervising institutions and agencies caring for children. Approximately 40,000 children of the Commonwealth receive some type of care. The supervision includes visitation to all institutions that house children.

Another type of responsibility is the care of aged persons. One Field Representative of this Bureau visits all County Homes and State-aided Homes for the Aged.

The Division of Homes and Hospitals supervises the 172 State-aided Hospitals. This Division also inspects and issues licenses for the operation of private hospitals, nursing homes, and convalescent homes.

Tables included in this bulletin will also give facts concerning services rendered by the State Council for the Blind. These services include prevention and remedial eye care, home teaching, and rehabilitation.

All Bureaus of the Department of Welfare work closely together, and there are frequent exchanges of information and service between Bureaus.

Department of Welfare
Charlie R. Barber
Secretary

This is the third bulletin of the Twelfth Annual Statistical Report. In this report will be found one section which lists the activities of the Bureau of Institutional Management, and another section which deals with the Bureau of Community Work.

Tables depicting laundry activities, food consumption, unit price of food, farm production and utilities, are listed in the part dealing with the Bureau of Institutional Management. There are also tables which give the analysis of the different types of services rendered by the ten State-owned Hospitals.

Statistics concerning children receiving care away from their own home appears under the Bureau of Community Work. These include activities of the Rural Child Welfare Unit and also the Tri-County Child Guidance Center.

In addition to the problems involving children, this Bureau is also charged with the responsibility of supervising the County Homes and Institutions which deal with the aged. Facts on these problems will be found in this bulletin.

Analysis of costs in State-aided Hospitals and State-owned Institutions, as well as tables concerning the number of employees are a part of this report.

This bulletin was compiled by the Division of Research and Statistics under the direction of Mrs. Gertrude H. Thompson. The material was prepared in cooperation with the two Bureaus.

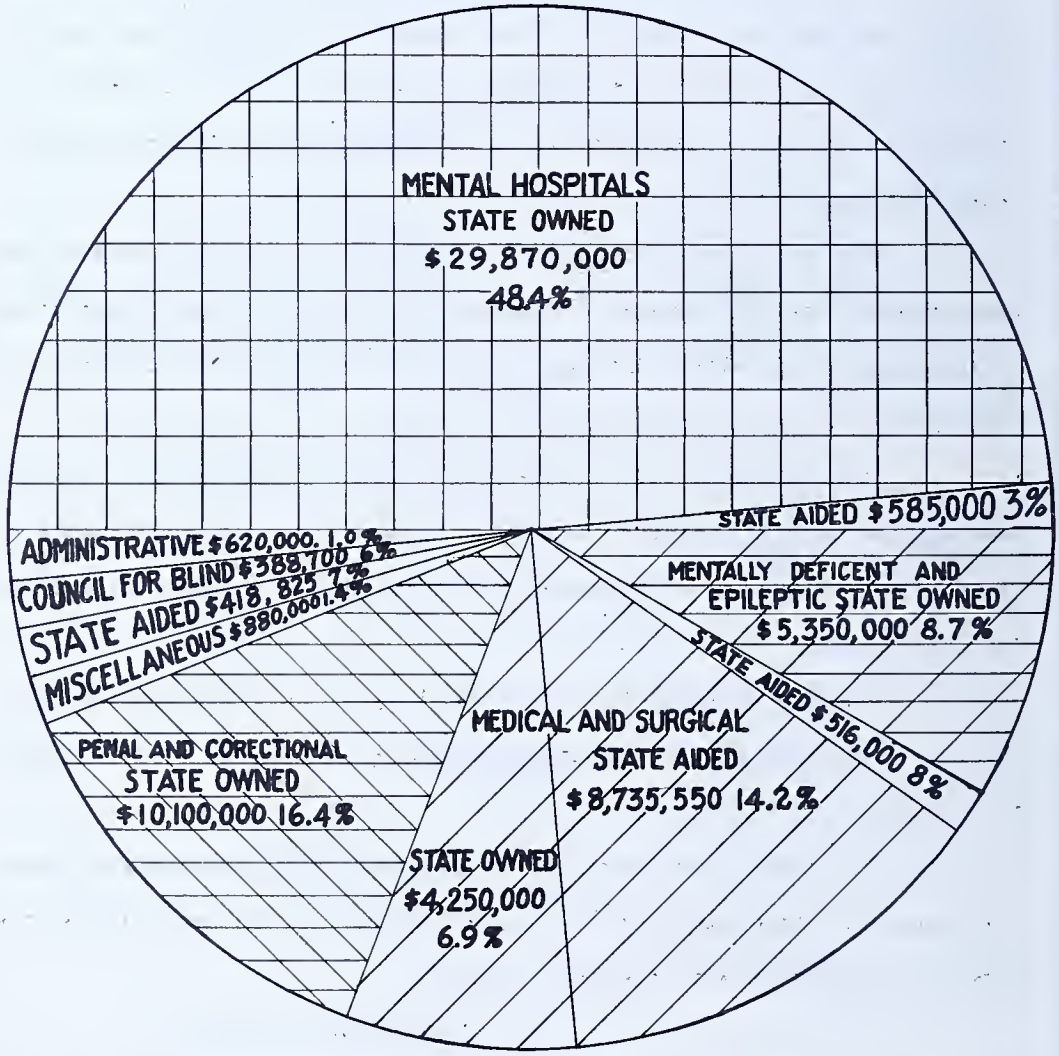
1945 – 1947 APPROPRIATIONS
$61,714,075



WHERE THE WELFARE DOLLARS GO

BUREAU OF INSTITUTIONAL MANAGEMENT

The Bureau of Institutional Management is responsible to the Commonwealth and forty State-owned institutions for developing and supervising a program providing food, laundry, steam, light, water, sewage disposal, farm products and general maintenance. Standards for goals of performance are promoted. Key employees are called together for conferences on important problems. Monthly summaries of data reflecting efficiency of the food, laundry, hospital, farm and engineering service records are issued to institutions.

Dietary

The use of the Basic Ration, a low cost adequate diet, as a minimum standard for food consumption in the institutions has been controlled during 1945-46 by the availability of certain foods. The table showing the Basic Ration, the Average Daily Consumption of Food per Person, shows a gradual decrease in food consumed in the 16 institutions in the mental hospital group during the entire war period and with the post-war year, 1945-46, showing the greatest decrease. The inavailability of certain foods and decreased consumption accounts for the decrease in food costs for that period. The O.P.A. controlled prices of commodities until about August 1946; therefore, a decided price increase is not observed until later as shown in the Table Unit Prices per Pound of Type Foods.

Increased production of food at the institutions helped to protect the population against more critical decreases in certain items, as for example, beef. The processing of vegetables was also a major program in institutions having canning facilities. About 521,923 number

10 tin cans of produce was processed for use during the period when farms are not productive.

Personnel shortages were also extremely critical during this period. A Farm and Food Conference was held at State College on August 1945 and sectional dietary meetings were held at three institutions in April and May 1946.

A new dietary building, N-5, was under construction at the Philadelphia State Hospital, with plans for new dietary buildings at Danville and Mayview, and the remodeling and enlargement of dietary facilities at Clark Summit were under study.

Farms

At 26 Mental and Penal Institutions, land totaling 34,127 acres is controlled. This land, approximately 15,000 acres of which is cultivated, enables a degree of isolation desirable alike to community and institution. Utilization of land permits wholesome occupation in barns, fields and gardens for a considerable number of patients or inmates. Definite plans are developed for the use of all land in order that the maximum contribution may be made to the over all institutional program. Such plans are developed annually in conferences of institutional administrators with representatives of the Department of Welfare. Food production has long been an important factor in institutional economy. Indeed, during recent war years of scarcity and high prices, institutions would frequently have lacked essential foods were it not for their own production. In planning land use, priority is given to vegetables, potatoes and orchards. Field crops to support live stock use the remainder of tillable acreage. Land unfit for cultivation is

utilized for pasture or forest. All land management is planned not only for maximum production but for conservation and development of soil resources.

Dairy, cattle, swine and poultry are maintained at institutions having facilities for handling them. These livestock enterprises contribute part or all the milk, pork and eggs used by the respective institutions. Beef cattle are fattened for institutional use at such institutions as have surplus pasture or roughage above dairy requirements. This latter enterprise has of necessity been expanded during war years in order to assure needed meat for dietary use.

Laundry

In the table giving data on Laundry Program, Employees and Operating Costs, it will be noted that one paid employee only is employed at penal institutions except in one instance. Employment is provided for 249 inmates at penal institutions and for 1304 mental patients in connection with laundry operation.

The gross cost per pound for all institutions is .0087. This figure represents a very considerable economy in comparison with commercial costs. In mental hospitals, the gross cost is .0073, more than .1 of 1¢ less than the average for all institutions. This economy is due in large part to the large population in most mental hospitals. Another factor affecting costs is the comparatively high poundage of soiled goods per capita, which in addition to a large population increases the total poundage.

Laundry Test Bundle

In the table showing Laundry Test Bundle Analysis, a compari-

son of quality of performance is made between the first five test bundles run during 1935-36 and the 37th test bundle, run in 1946. Marked over-all improvement in quality is evident. Breaking strength in the last test bundle averaged 10.2% or 15% lower than for the first five test bundles; whiteness retention averaged 6% higher and soil removal 4% higher. These test bundle analysis were made at the Ellen H. Richards Institute of the Pennsylvania State College. They constitute a part of the laundry supervisory service arranged through that agency and which services are made available to all State-owned institutions.

Engineering

The engineering activities cover the various utilities used in conjunction with the operation of the institutions and the maintenance problems that effect the continuity of each of the utilities together with the care of physical property. The table indicating Quantities Used and Costs of Furnishing Operating Services covers volume of items and corresponding costs for basic maintenance materials and utilities. Coal constitutes the largest single item. Coal cost for the year ending May 31, 1946 was 11% greater than for the previous year. The additional cost indicates a rise in price.

Purchase of electricity represents approximately one-half the current actually used. The total KWH purchased was approximately 11% greater in 1946. A considerable portion of this increase was due to the addition of data from Clarks Summit State Hospital.

About 3% less water obviously was used than in 1945 while the cost was slightly more than 4% less.

Hospital Service

Analysis of Hospital Service at State-owned Medical and Surgical Hospitals is shown in the following tables:

Patients, Type of Service and Number
Laboratory Analysis and X-Ray Examinations, Type and Number
Clinics, Type and Attendance

The table relating to Patients, Types of Service and Number, reveals that there were 35,957 patients admitted to the ten hospitals, an increase of more than two thousand over the previous year.

The table on Laboratory Analysis and X-Ray Examinations shows a total of 351,173 laboratory examinations, or 9.8 tests per patient admitted. Though the total number of examinations is somewhat lower than the previous year, there has been notable increase in the number of Electrocardiogram and Basal Metabolism tests, also in the number of patients given Blood Transfusions, and Blood Plasma. There was a total of 38,342 X-Ray Examinations reported this year, an increase of 4,650 over last year.

As will be noted in the table on Clinic Attendance, the number of visits was 45,134, an increase of nearly 500 over last year.

Nursing Education

In the table under Nursing Education in State-owned Hospitals, it will be noted that 103 students completed the three year course in nursing, a slight decrease from last year.

The number of students receiving affiliation in psychiatric nursing in our State Mental Hospitals continues to increase as will be observed in the table. The Philadelphia State Hospital established an approved affiliate program, October 1, 1945, and at the end of the

fiscal year, five nursing schools were represented in their affiliate group of students.

As indicated in the table, the Senior Cadet Program conducted in seven State Mental Hospitals, was taken advantage of by 111 Senior Cadets during the year, an increase of 54 over the previous year. These courses were well organized. The majority of the Senior Cadets remained for the six month course and rendered excellent service.

The Harrisburg State Hospital has maintained its course for licensed attendants, though the number of students completing the course has gradually decreased. The more favorable opportunities being offered to both men and women in the community has resulted in less stable personnel.

Bureau of Institutional Management
R. Bruce Dunlap
Director

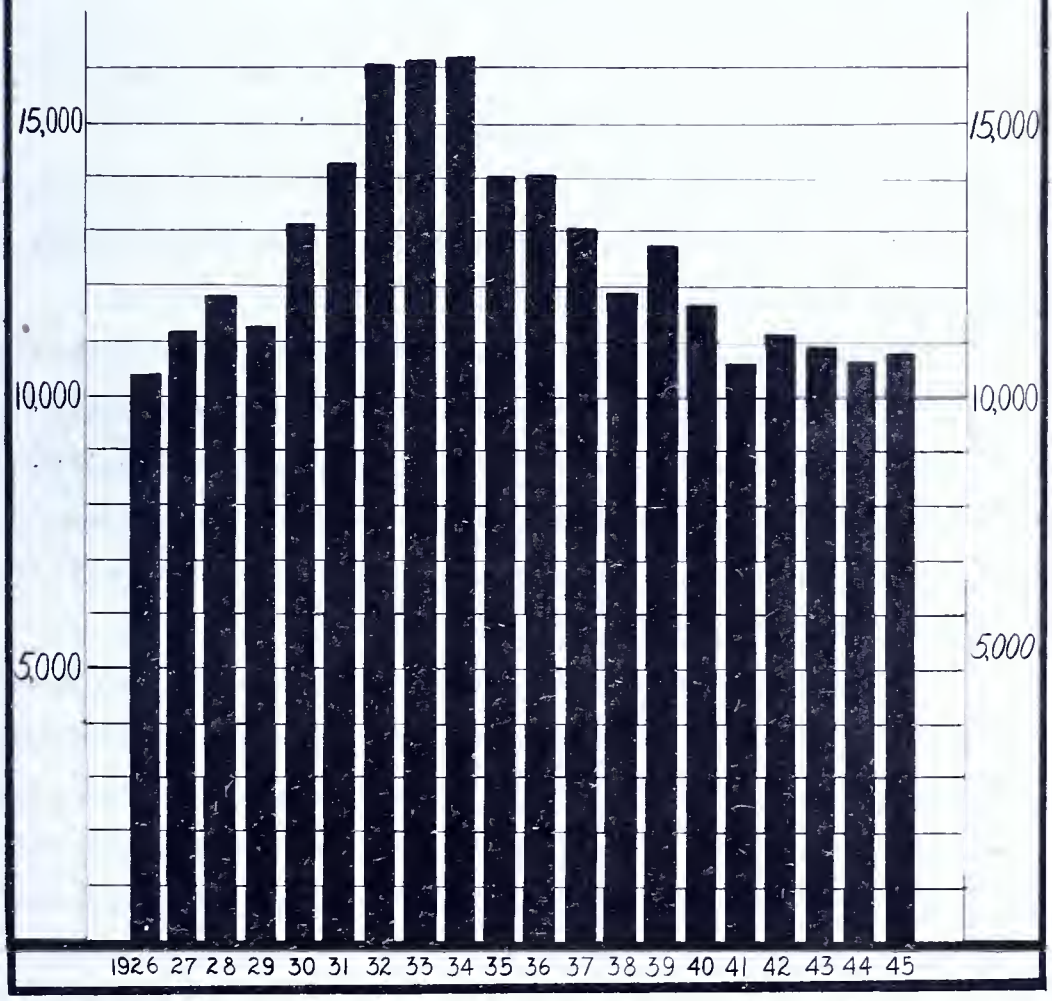
COUNTY HOMES

Population — December 31

1926 - 1945



BUREAU OF COMMUNITY WORK

It is difficult to present in statistical form the activities of the Bureau of Community Work. This Bureau is concerned with many of the services of the community.

One of the major responsibilities is the supervision of institutions and agencies which care for children away from their own home. There are approximately 40,000 children each year in Pennsylvania, who are receiving this type of care.

In fulfilling the responsibility for children, the Bureau also participates in advising and aiding communities in constructing programs for the benefit of youth. In the 1945 session of legislature, an act was passed which placed upon the Bureau of Community Work, the responsibility of stimulating crime prevention programs.

Another pressing problem is the care of the aged. Two Divisions of the Bureau come in contact with this problem. One Division supervises the County Homes and Homes for the Aged. The other Division licenses the commercial convalescent and nursing homes in which many aged people are housed. The number of aged people requiring care away from their own home or the homes of relatives is increasing each year.

In planning the activity of the Bureau of Community Work, two major plans are being followed. First the attempt to work closely with citizen organizations so that an accurate picture can be secured of the problems in the different localities. An excellent example of this was the Youth Conservation Program which was conducted in cooperation with the State Federation of Women's Clubs. As a part of this cooperative arrangement a statewide survey was made of the services which exist for children. The survey

was made by the member clubs and the results of this project were very fruitful.

In addition to the supervisory responsibilities which are placed upon the Bureau by legislative mandate, it is the aim to exercise this responsibility as a service feature. Every means is being utilized to assist institutions and agencies in improving their program. The Bureau has participated in training courses for institutional employees, probation and parole officers, and has conducted meetings at the request of different organizations and agencies.

In the administration of the acts which involve licensure every effort is put forth to aid the applicant to attain and maintain reasonable standards of operation.

An increase has been noted in the number of agencies applying for permits to solicit funds. In administering this act the welfare of the individual citizen and business organization is jointly considered with the interests of the charitable organizations. In many cases suggestions and recommendations have been made to agencies which protect them from unscrupulous individuals.

The Division of Research and Statistics in addition to the regular bulletins conducts many special studies. Some of these studies are for the different Bureaus of the Department and others are at the request of institutions or organizations. The Rural Child Welfare Staff is called upon for consultative service on problems of child welfare in many areas of the state. Frequently visitors come to the Tri-County Child Guidance Center when they are interested in organizing such a service in their own community.

Although the responsibilities of the Bureau of Community Work are

of a diversified nature there is close integration in all Divisions. Special services such as those of the Interracial Consultant are available to all members of the staff. In addition to the coordination of inter-Bureau activities close contact is maintained with the other Bureaus of the Department. This eliminates unnecessary over-lapping and improves the efficiency of the service.

COUNCIL FOR THE BLIND

Two questions are often asked of the Council for the Blind. They are:

1. How much did it cost the taxpayers of Pennsylvania, for the Council for the Blind to render how much of what kind of services to how many blind during the year ending May 31, 1946.

2. How much did it cost the taxpayers of Pennsylvania, for the Council for the Blind to put how many dollars into the pockets of how many blind during the year ending May 31, 1946.

In answer to the above questions, an analysis of the gross expenditures of the Council for the year ending May 31, 1946, reveals the following general facts:

Home Teaching

The approximate cost for the operation of this section for the period was $39,103. The number of teachers averaged 13, with an average of 50 students per teacher. However, in addition to the actual students taught, more than three times that number of blind persons were given services during the same period. A total of 2,185 blind persons were visited making a per capita cost of $17.89 for the 12 months. The total number of calls made was 9,886 at the cost of $3.95 per call based upon the total cost of the program as shown above. The services given were instruction in embosed type, writing, typing, crafts, personal adjustment, leisure time activities together with an understanding of the local resources for the blind and interpretation of problems of the blind to families and communities.

Remedial Eye Care and Prevention of Blindness

During the period, eye care was given to, or supplemental work was performed for 5,181 persons, resulting in the expending of $58,689.86 for such services as examination, glasses, refractions, repair of glasses, surgery, treatment, transportation and prosthesis. Of the 5,181 persons served, 2,066 persons were out patients who received clinical services. A total of 5,161 visually handicapped persons were served, making a per capita cost of $11.33 for the 12 months.

Rehabilitation

During the period, this section provided a total gross income of $211,435 to 152 different industrially blind residents of the Commonwealth. This income was created at an over-all cost of approximately $33,000. The service cost included professional and stenographic salaries, traveling expenses and office supplies. The average yearly income of the persons placed in employment was $1,391. The average monthly income $115.91. This average monthly income exceeded the ceiling of the pension by $15.91.

It cost the Commonwealth an average of $217 per client to serve the above number in employment. This section was able to provide $1.00 of income for the above mentioned number of clients at a cost of 15.6 cents.

The industrial unit of this section placed or maintained in employment 84 persons during the period covered. The average monthly income of these persons was $114. Average yearly income $1,368.

The business unit placed or maintained in employment 50 persons with an average monthly income of $175. An average yearly income of $2,100.

The sheltered employment unit placed or maintained in, and created employment for 18 persons, with average yearly income of $179. Average monthly income $15.

The services extended to the 152 blind persons consisted of counseling, training and employment placement. These services were rendered without the benefits of Act 75A or Public Law 113.

During the year ending May 31, 1946, the gross expenditure of the Council was approximately $130,792.86 and we served 7,518 visually handicapped and blind Pennsylvanians, resulting in an average per capita cost of $17.39 for services rendered.
